Critical Information Summary

ONdesk TRAVELLER 19

Description about the service

This is an IP based voice telephony service that is supplied over a fixed broadband internet service and a wired ethernet port that can be used to make national and international calls. Software is required to be downloaded onto your mobile device or computer to access this service. No handset is supplied with this plan.

Minimum monthly charge payable: \$19 per extension per month

Maximum charge for early termination: \$684

Minimum term applicable: 36 months

The internet service may be supplied by any service provider. Each handset extension requires a minimum bandwidth of 100kbps of uncongested upstream and downstream for optimal quality. Call quality may be affected by the internet connection, firewall, hardware or other matters outside the control of GBNCo. Whilst 000 calls can be made most services connected to the broadband network won't work during a power outage. This means you won't be able to call 000 in a power outage. It's a good idea to have another way of contacting 000 in a power outage, such as a charged mobile phone. Calls to 1900, back to base alarms, fax services and EFTPOS systems cannot be used with the voice IP Voice service.
